PROFESSIONAL SUMMARY

I am a Performance-driven Web Engineer with over 4 years of experience specializing in scalable Full-Stack architectures using Next.js, TypeScript, and Node.js. I excel in bridging frontend excellence with robust backend integration, consistently optimizing site performance by 40%. Adept at embedding AI and agentic automation into operational workflows. Proven leadership skills in Agile environments, focusing on high-availability engineering, security, and enhancing seamless user experiences

EXPERIENCE

Full-Stack Developer

contract

Information Technology and Media Services

06/2023 - 12/2025

- I integrated Stripe API to manage secure payment processing, achieving 99.9% transaction reliability for a base of 2,000+ monthly active users
- I improved application response times by 40% through advanced code-splitting, lazy loading, and aggressive image optimization
- I identified and resolved over 100 critical vulnerabilities, resulting in a 15% reduction in application crash rates and enhanced system stability
- Mentored junior engineers on clean code principles and modular design, while maintaining 95% sprint objective completion in an Agile environment

Web Developer

Intern

Verbum Technology and Media Services

01/2022 - 01/2024

- I developed 5 responsive React/TypeScript applications, supporting a base of 2,000 monthly active users with high stability.
- I achieved a 40% reduction in page load times via advanced code-splitting, lazy loading, and image optimization strategies.
- I translated high-fidelity Figma designs into accessible, pixel-perfect UI components compliant with WCAG 2.1 standards.
- I mentored junior engineers on clean code principles and modular design, while maintaining 95% sprint objective completion in an Agile environment.

Ongoing Projects

AI-Powered Health Clinic Ecosystem | Lead Engineer

Key Features

- Internal Workflow Automation:** We engineered an operational "brain" for the University clinic that automates student registration, digital ID generation, and appointment scheduling
- AI Integration:** We implemented AI-driven monitoring states that analyze health metrics to provide personalized, real-time medical recommendations

AI-Powered Health Insights: We deployed AI algorithms to track health metrics, delivering tailored advice, nutritional tips, and lifestyle changes based on user data and expert input.

EDUCATION

Bsc. Computer Science

University of Ibadan

01/2022 - 12/2027

KEY ACHIEVEMENTS

I architected and deployed a secure, high-availability Full-Stack E-commerce ecosystem using Next.js 14 and Supabase, integrating Stripe API to maintain 99.9% transaction reliability while achieving a 40% increase in performance through advanced optimization strategies for 2,000+ monthly active users.
